HC-CARGO LED Work Lamps

LED lighting technology is getting increasingly popular within the automotive industry. The industry has rapidly adopted LEDs for virtually all signaling and marking and work light functions on trucks, industrial and agricultural vehicles. This is primarily due to the fact that LEDs' light output has increased over the years and become comparable to incandescent bulbs and HID (High Intensity Discharge) units. At the same time the power consumption is kept at a minimum giving the LED technology a "green" and environmentally friendly approach. Furthermore the extremely long service life reduces vehicle downtime significantly compared to incandescent and HID light technology.

HC-CARGO LED Work Lamps

LED lighting technology is getting increasingly popular within the automotive industry. The industry has rapidly adopted LEDs for virtually all signaling, marking and work light functions on trucks, industrial and agricultural vehicles due to their economic power consumption, long durability and powerful light output.

HC-CARGO Compact, efficient LED Lights

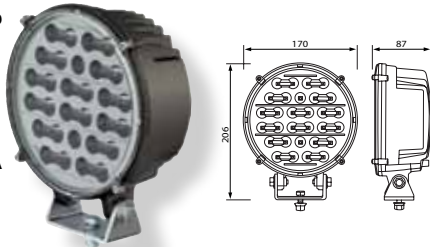

171838 - LED Work Lamp

- 3000 lumen
- 30 watt
- 9 - 36 Volt
- Current draw Max 3.5 A
- IP 67

171846 - LED Work Lamp

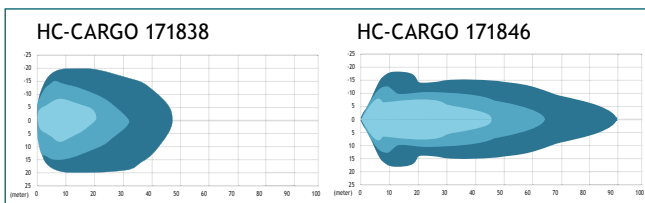

- 5400 lumen
- 67,5 watt
- 9 - 36 Volt
- Current draw Max 4.5 A
- IP 67

These powerful LED Work Lamps provide ultra-high performance in a variety of fields. Agricultural, utility vehicles, off road, road works and construction areas and with zero maintenance: 50.000 working hours at 100% efficiency. They are constructed and tested to live up to the toughest demands.

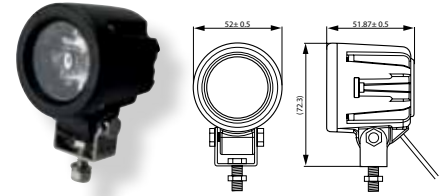

Features

- Aluminium housing
- Polycarbonat lens
- 2 pole Super Seal connector
- Load dump and polarity inversion protected
- EMC Homologated
- Working Temperature -40°C - 80°C

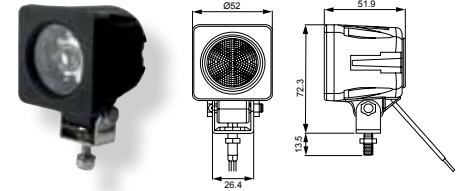

171811 - LED Work Lamp

- 600 lumen
- Voltage: 10-80V
- Watt: 5
- 1 LED

171847 - LED Work Lamp

- 600 lumen
- Voltage: 10-80V
- Watt: 5
- 1 LED

Features

- Polycarbonate lens
- Aluminium housing
- Pre-wired with 30 cm cable
- Shock resistant
- IP67
- EMC Homologated

These extremely compact LED work lamps are equipped with 1 high power LED unit. The lamps provide a bright and safe work environment and have a very low power consumption. They are ideal in areas where space is scarce and suitable for off-road vehicles, forklifts, truck and trailers, agricultural and industrial applications. The LED work lamps are supplied with a swivel stainless steel bracket and a one bolt mounting system which allows for back and forth tilt adjustment and easy installation.
